Profile

Computer Science & Engineering graduate with hands-on experience in Machine Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and Natural Language Processing (NLP). Proficient in developing AI-powered applications using Python, FastAPI, PyTorch, LangChain, and vector databases. Passionate about building scalable AI systems, backend APIs, workflow automation, and data-driven solutions for real-world business problems.

Professional Experience

- Jan 2026 – Present
Ahmedabad, India

AI/ML Intern, Aspire Softserv Pvt. Ltd.
 - Contributed to AI-driven projects involving database integration, backend workflow development, and system optimization.
 - Implemented Retrieval-Augmented Generation (RAG), embedding pipelines, semantic retrieval, and context-aware response generation using Large Language Models (LLMs).
 - Developed workflow automation solutions using n8n to streamline business processes and integrate AI-powered services.
- May 2025 – July 2025
Remote

Data Engineering Intern, SAP & Edunet Foundation
 - Worked with SAP HANA Cloud and SAP Business Technology Platform (BTP) to design and deploy data pipelines.
 - Designed and implemented data models and provisioned datasets for analytics use cases.
 - Performed data cleaning, transformation, and analysis using Python and Pandas, enhancing dataset quality and analytics readiness.

Projects

Enterprise Multi-Agent RAG Assistant

- Developed a Multi-Agent RAG system with Retriever, Generator, and Critic agents, improving response accuracy and relevance.
- Implemented document ingestion, semantic search, hybrid retrieval, and response generation, reducing hallucinated outputs by 55%.
- Designed and developed scalable AI orchestration workflows using vector databases and LLM pipelines, improving retrieval performance and contextual response quality by 70%.

Movie Revenue Prediction

- Developed machine learning models to predict movie box office revenue using features such as budget, popularity, and runtime, achieving approximately 18% higher prediction accuracy than the baseline model.
- Applied data cleaning, feature engineering, and exploratory data analysis (EDA) on real-world movie datasets to enhance data quality and model reliability.

- Implemented regression algorithms that improved prediction accuracy by approximately 15–20% compared to baseline models.

AI-Powered Story Generator

- Built a privacy-preserving Streamlit web application for AI-based short story generation using user prompts, reducing response generation time by 40%
- Implemented Hugging Face text-to-image models to generate illustrative visuals with over 90% prompt relevance accuracy.
- Content generation was fully privacy-preserving – no user images or identifiable information required.

Skills:

Programming Languages

Python, SQL

Machine Learning & AI

Machine Learning, Deep Learning, Natural Language Processing (NLP), Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Transformers, Neural Networks, XGBoost, Prompt Engineering, Embeddings, Fine-tuning Fundamentals, Exploratory Data Analysis (EDA)

Frameworks & Libraries

FastAPI, Scikit-learn, PyTorch, HuggingFace, LangChain, Pandas, NumPy

Tools & Platforms

Git, GitHub, Docker, Kubernetes (Basics), n8n, Teachable Machine

Education:

2022 - 2026	B.E. in Computer Science & Engineering (AI/ML Minor)	CGPA: 8.93/10
Bardoli, Gujarat, India	<i>R. N. G. Patel Institute of Technology, Bardoli, Gujarat, India</i>	
2020 - 2022	Higher Secondary Certificate	63%
Vapi, Gujarat, India	<i>R.G.A.S. High School, Vapi, Gujarat, India</i>	

Certification:

- Python for Data Science and AI – IBM (2025)
- Python Data Analytics – Meta (2025)
- Data Analysis with Pandas and Python – Packt (2025)
- GenAI-Powered Data Analytics Job Simulation – TATA Group (2025)
- Data Analytics Job Simulation – Deloitte (2025)
- Python Programming – SAP × Edunet Foundation (2024)
